Test 1 is taken when the client has not used any mobile phone for at least 1 hour.  
 Test 2 is taken right after 10 min. use of mobile phone with matrix assembly.  
 Test 3 is taken right after 10 min. use of identical phone without matrix assembly.

Individuals 1-7 with various organ/process Indications and 3 different phones.

Tested: Ind.1: Trachea. Ind.2 Renal filtration. Ind.3: Right frontal lobe of brain.  
 Ind.4: Immune reaction. Ind.5: Left temporal lobe of brain. Ind.6: Renal filtration.  
 Ind.7: Same result for immune reaction and digestive- and endocrine imbalance.

Several indications of negative effects of mobile telephone usage can be measured, mostly in people's weakest organs/functions and the areas closest to the exposure.

Complete test-report can be found here:
